

Minimum system requirements:

- Pentium 4 / 2 GHz / 1 GB RAM

The minimum system requirements indicate, what configurations the PC system should have, so that the software can be used. Depending on the scope of the project, however, should be a more powerful system available.

Also hardware components (e.g.: Audio-/Midi-Interfaces) which are used in combination with the MPS, are decided for the system requirements. Therefore, observe in addition the system requirement of the used hardware components.
